

GENERAL / SURFACE CLEANING

- This PDF/printable version is displayed here for your convenience, in case; you have to collect below mentioned information from your colleague.

If you have all informations, please visit

<http://www.pressurejet.com/Enquiry.aspx?Id=10> and send it to us.

- 1) Question: Have you ever used high pressure water jet cleaning pump? If yes, please let us know the make and other details. i.e. application, flow rate, pressure etc...**

Question Explanation: This question is very important to let us know your understanding / knowledge about this product. It is essential for us to open right communication.

- 2) Question: What is your exact application?**

Question Explanation : Please inform specifically about machine or component name to be cleaned.e.g. Filter, Casting, Floor, Swimming Pool, Mould, Utensil, Canteen, Reactor Vessel etc. This is important to offer you right accessories.

- 3) Question: Working hours / Duty. Please specify clearly.**

Question Explanation: It is very important to inform working hours per day or per week to decide PressureJet pump. If you require using High Pressure pump for 8-10 hours every day and 8-10 hours every week, then PressureJet Pump model may be different.

- 4) Question: what may be the pressure? If you don't know, then please inform existing cleaning method.**

Question Explanation: There are thousands of different applications of High PressureJet pumps. For all applications, it is difficult for manufacturer to decide/know right pressure, which is very important Technical Data. Therefore, client should inform

approximate pressure. If you do not inform exact pressure, then please inform existing cleaning method.

5) Question: Flow requirement, if you know or guess.

Question Explanation: There are thousands of different applications of High PressureJet pumps. For all applications, it is difficult for manufacturer to decide/know right flow rate, which is very important Technical Data. Therefore, client should inform approximate flow rate. If you do not know, please let us know your existing cleaning process.

6) Question: Approx. Area or size and no. of component / articles to be cleaned & time available.

Question Explanation: As you know, there are several different models of different flow rate and pressure. Many a time, wrong selection (under capacity/over capacity) may lead to failure of pump or causing nonviable operation of the pump. Therefore, it is essential to inform approximate area or no. of job and time, to select appropriate High Pressure Plunger Pump.

7) Question: What is your existing process to clean?

Question Explanation: Many a time, customer is not able to inform/guess right pressure &/or flow rate. We understand the same very well. Therefore, it is essential to inform your existing cleaning method in detail to enable us to decide right High Pressure WaterJet pump and its cleaning accessories. This may include size and type of equipment, typical cleaning method, Time required, manpower required, details of tool / machine or chemical used etc.
