High Pressure Triplex Plunger Pump

V- 57 Series

2017
PressureJet Systems Pvt. Ltd. was established in 1996 in Ahmedabad, India. PressureJet (An ISO 9001:2008 certified company) is a leading manufacturer of high pressure, positive displacement, reciprocating triplex plunger pumps and relevant accessories. These pumps are most suitable for various applications like Water Jet Cleaning, Injection, Hydro test Hydro jetting, Hydro Blasting, Sewer jetting, Firefighting & many more.

Today, PressureJet has a work force of more than 85 dedicated people. We have 11000 Sq. ft. area in Asia's premier industrial estate in Ahmedabad. Out of which, 5000 Sq. ft. area has been allocated for manufacturing activities.

All components are quality checked in the controlled environment of the Q. C. laboratory. We have the most modern measurement equipment such as 3D CMM (Coordinate Measuring Machine), surface roughness measurement Instrument, hardness tester etc. All components are tracked by barcode system with oracle ERP.

3D modelling is an important aid in designing the technical aspects of engineer's product.

Simulation can really help in making the correct design decisions during the development stage.

At PressureJet, we follow by using all necessary software.
Machine Shop

Our Ultra-modern machine shop enables us to manufacture an extremely wide range of components. We can be very flexible in our production planning, while maintaining a high standard of quality with fully automatic machining station. Computer controlled machining stations ensure constant dimensional accuracy.

Assembly & Testing

In this area, all components for the various pump units come together. Pumps and engine or motors are assembled on the skid frame, Accessories such as booster pump, Strainers, PRV, Safety Valve etc. are assembled.

PressureJet products are subject to stringent quality control. All pumps are tested at maximum load prior to dispatch for decided time period. All measurement taken during the testing are electronically stored in computer through fully Automatic Test Bench and then it can be printed. Test report is always provided with the pump.

Store / Service

A product is only as good as the service backing it. We have a dedicated team of technicians available for 24 X 7. We keep majority of spares Ex-stock to reduce down time.
V-57 Series bare Pump

**Salient Futures**
- Field proven design.
- Casting Stainless steel Pump Head construction with high strength.
- Rigorously Subjected to full load testing.
- Manufactured on state of the art machinery.
- Light in weight & Heavy duty construction with Intermediate duty model.
- Splash lubrication.
- Easy Maintenance.
- Both side mounting available.
- Pump design is suitable for Inbuilt Gear, Belt drive & Hydraulic motor Driven System.

**Specification**
- Plunger Stroke: 57 mm
- Max. plunger speed: 1.14 m/sec. @ 600 spm
- Plunger force: 23.5 KN (2400 kgf)
- Required Inlet Pressure min./max.: 2-3 bar (Booster Pump flow require min. 1.5 times of rated flow rate)
- Oil Type: SAE – 80 W 90
- Oil capacity: 8 ltr.
- Max. Liquid Temp.: 70 °C (160°F)
- Discharge Connection: 1” BSPF
- Suction Connection: 2” BSPF

**Note:** Flow Rate is in LPM, Pressure is in Bar, Motor Power in H.P in above chart.

Required Engine/PTO HP will be 20% higher than motor HP.

**Note:** All flow rates are based on 100% volumetric efficiency, Actual will be 90-95%.

Material of Construction of Major Internal Parts

1. Crank Case (Main Body)
   Grey Iron: Main body in grey iron casting FG-260 with Honned surface finish bore.

2. External Helical Gear Box
   Alloy steel: Helical gear is nitride hardened and precision ground for extremely long life and durability.

3. Bearing
   Oversized for maximum life and load disbursement. Self-alignment roller bearing enables it to handle 26% more load than other pumps.

4. Crankshaft
   Alloy steel: Crankshaft is made of nitratred, hardened and precision ground for extremely long life and durability.

5. Connecting Rod
   Alloy Steel: Forged steel connecting rods with antifricition bearings. Heavy pin area construction, for added load strength.

6. Cross Head Assembly. (Piston & Piston Rod)
   Grey Iron & Stainless Steel: Alloy steel casting piston & stainless steel piston rod are hardened & super finish surface.

7. Pump Head (Liquid End)
   Pump head is made of high corrosion resistant. Material (SG Iron / SS304)

8. Plunger (Ceramic / Tungsten coated)
   Primarily composed of ceramic coated or Tungsten coated on SS. Surface roughness is extremely good i.e. <0.2 Ra.

9. Plunger Seal
   Chevron Seal: - "V" style strong and tightens under load packing for high compressive & tensile strength ensure effective sealing.

10. Complete Valve Internal (Valve Assembly)
    Stainless Steel: Valves made of stainless steel for hardened & anti corrosion hard surface coated for long life. High volumetric efficiency valves operate at 95% plus efficiency.
