# Mastering the ART OF CHANNELISING WATER Since 1996

Dial a WhatsApp video call to +91 9375 022 359 and enjoy virtual live tour of our World-Class Infrastructure. You will discover an undisputed leader. ONLY TRUE LEADERS CAN OFFER YOU THIS TOUR!

**SEEING IS BELIVING** 

We challenge all\* High Pressure Triplex Plunger Pump manufacturers to compare with PressureJet and publish their quality parameters and infrastructure details. Do you think any manufacturer would take up this challenge?

\*This is with context to Indian manufacturer.

### Hydro Jetting Machine (up to 1400 Bar/ 20000 PSI) (Tube Cleaning & Pipe Cleaning)

#### Important Applications in Tube Cleaning:

- Heat exchanger
- Evaporator
- Condenser
- Pipe
- Boiler
- Calandria

http://pressurejet.com/hydro-jetting-machine.aspx

PressureJet provides a continuous 200-hour, full-load running test of your pump. Can any other manufacturer accept this challenge to prove their quality?

### Hydro Blasting Machine (up to 1400 Bar/ 20000 PSI)

#### **Important Applications:**

- Paint removal
- Investment casting cleaning
- Chloride removal from concrete
- Corrosion removal from pilings
- Kiln cleaning
- Ship hull cleaning
- Green concrete cutting/removal
- Cyclo-jamming removal in cement plant
- Ball cleaning/cutting in cement plant

#### A http://pressurejet.com/hydro-blasting-machine.aspx

PressureJet offers 'Lowest Price Guarantee'\* compared to other Indian manufacturers. Can anyone else offer this?

\*No conditions applied.

### High Pressure Cleaners (up to 500 Bar)

(3 HP to 40 HP)

#### Important Applications in Cleaning:

- Duct
- Mould
- Dust & dirt
- Floor & roof
- General surface
- Vehicle
- Components
- Machinery & equipment

http://pressurejet.com/high-pressure-cleaners.aspx

Except PressureJet, who else can offer you a pump which passes through as many as 694 quality parameters and then reaches you? At PressureJet, producing consistent quality is a habit.

## Hydro Test Pumps (up to 1500 Bar)

"

#### Important Applications in Testing:

- Cross country pipeline
- Saw pipes
- Pipes & tubes
- Pumps & valves
- Boiler, pressure vessel & tanks
- Hydraulic fittings
- Rubber hose pre-filling & hydro test
- Cylinder

http://pressurejet.com/high-pressure-hydro-testing-pump.aspx

High Pressure Triplex Plunger Pumps have similar mechanism like an engine does. We assemble the pumps in a dust-free environment with the help of Atlas Copco CNC Torque Wrench. Other than PressureJet, who else can do it in INDIA?

### Sewer Jetting Pumps (up to 300 Bar)

• Flow range from 14 LPM to 445 LPM

## http://pressurejet.com/sewer-jetting-pumps.aspx

## **UHP Fire Fighting Pumps**

- Fast decreasing rate in temperature
- Ultra effective
- Consumes very less water compared to conventional fire pumps
- 10 times more efficient than conventional pumps
- Can directly coupled with fire tender or water tender

http://pressurejet.com/uhp-fire-fighting-pumps.aspx

The multinational conglomerate GE runs on ORACLE ERP! PressureJet, too, runs on ORACLE ERP!!

## Wet Sandblasting Equipment

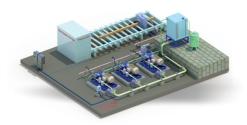

- No need of any chemical during operation
- Deburr machined parts

- Can obtain finishing demand for surface roughness
- Environment-friendly operation

- Highly-experienced technocrats design the descaling system
- Cost effective
- Highly-reliable descaling system for primary & secondary descaling

### Attp://pressurejet.com/descaling-system.aspx

How will you differentiate between an ordinary and an extra-ordinary manufacturer?

An ordinary manufacturer will only let you know product specifications, but an extra-ordinary manufacturer will truly guide you in selecting the right equipment and teach you about quality.

## **Tank & Reactor Cleaning**

#### Important Applications in Cleaning:

- Oil tank
- Reactor
- Storage tank
- Petroleum storage
- Wastewater treatment plant tanks
- Tank & vessel cleaning in breweries
- Tank cleaning in chemical industries
